

week #1 update

what's your one-liner?

don't forget — your one-liner should be a short, catchy sentence that describes your project. it should be super easy to understand.

an ai-powered course advisor

why do you want to work on this? tell us a little about the story / why.

1-2 sentences is good.

i always found it extremely tedious/overwhelming to review my university's course catalogue. most of my course choices so far have come from word-to-mouth or some generic advice from my faculty advisor. i wanted to change that with the power of ai!

what domain are you building in? ex. ai, content, d2c, web3, etc.

ai

what stage is your project at rn?

just starting...

created the first version of my idea already.

working on getting my first 100 fans, downloads, users, subscribers, etc.

i have my first 100, working on getting more in n&w.

cool! can you tell us a little more about the latest and greatest with your project? how far along is it?

i created a working prototype of my project on a python notebook. i scraped my university's course catalogue for the faculty of science and am now able to get relevant answers using llama-3!

link your tweet, linkedin post, or insta reel w/ your idea slide. prove to us you shared it somewhere.

if you did more than one platform awesome, just hit "+ add another link" and if you didn't post online just give us any link proving you showed your idea to someone else and got feedback

https://x.com/_buildspace/status/1802071242910150777

+ add another link

submit three screenshots showing us the feedback you gave other ppl on their ideas.

click or drag file here

upload your idea slide here. this is the slide you export from canva or figma.

edit

delete

cool. anything else interesting happen this week with you or your project you wanna mention?

ex. you had a breakthrough with a bug, you went viral, you got your first 10 subscribers, whatever!
